

Dear Hiring Manager,

I am writing to express my interest in the Junior System Administrator, Linux Support Engineer, Cloud Support Engineer, Infrastructure Engineer, or related technical support position within your organization.

I recently completed my Bachelor of Engineering in Computer Science and Engineering from Sri Muthukumaran Institute of Technology, Anna University, with a CGPA of 7.89.

During my internship at VR Dakshin Pvt Ltd, I gained practical exposure to IT support activities, networking fundamentals, system maintenance, and troubleshooting. I also completed an internship at HCL Technologies, where I worked on QA Automation involving Python scripting, testing, debugging, and defect analysis in an enterprise environment.

In addition to my internships, I have completed hands-on projects involving Linux, AWS, Docker, Jenkins, Kubernetes, Terraform, Prometheus, and Grafana. These projects helped me develop practical knowledge of cloud infrastructure, automation, monitoring, and deployment workflows.

I am particularly interested in Linux administration, system support, cloud operations, infrastructure management, and troubleshooting. I am eager to apply my technical knowledge, learn from experienced professionals, and contribute effectively to the success of your organization.

Thank you for your time and consideration. I would welcome the opportunity to discuss my qualifications further.

Sincerely,

Surendar E
