PROFESSIONAL SUMMARY

Computer Science graduate with internship experience in QA Automation, IT Support, Linux fundamentals, networking, and DevOps projects. Hands-on exposure to Docker, Jenkins, Kubernetes, AWS, and monitoring tools through academic and project work. Seeking opportunities in Linux Administration, System Administrator, Cloud Support, Infrastructure, and Technical Support roles.

WORK EXPERIENCE

Certificates

HCL Technologies | QA Automation & DevOps Project Intern

- Performed manual and automated testing of the Cargo Display Panel (CDP), validating functionality, data accuracy, and system behavior across multiple modules. Sep 2024 – Nov 2025
- Developed Python (IronPython) automation scripts and data-driven testing utilities using Excel datasets, reducing repetitive manual testing efforts.
- Collaborated with developers and QA teams to analyze defects, debug automation workflows, maintain code through SVN version control, and enhance automation framework reliability.

VR Dakshin Pvt Ltd | IT Support Intern

Jun 2023 - Jul 2023

- Assisted in network infrastructure support activities and gained exposure to routers, switches, and enterprise networking environments.
- Supported troubleshooting of basic network connectivity issues and participated in system maintenance activities for end users.
- Performed hardware diagnostics and gained hands-on experience in IT support, system administration fundamentals, and network security concepts.

EDUCATION

Anna University

Chennai

BE (CSE) – Sri Muthukumaran Institute of Technology, Chennai | CGPA: 7.89 | 2021 - 2025

12th Grade – Chennai Corporation Higher Secondary School, Chennai | 76.94% | 2021

PROJECT EXPERIENCE

Simulated Production Deployment on AWS EKS (DevOps Dashboard)

github.com/Mr-Surendar

Tech Stack: AWS (EKS, EC2, VPC, ALB, IAM), Terraform, Docker, Kubernetes, Jenkins

- Provisioned AWS infrastructure including VPC, subnets, route tables, IAM roles, and security groups using Terraform.
- Deployed a containerized MERN application on AWS EKS with Kubernetes worker nodes and external traffic routing through ALB Ingress Controller.
- Designed and implemented a three-tier cloud architecture with automated CI/CD workflows using Jenkins and Docker..

Infrastructure as Code Automation

Tech Stack: Terraform, AWS (VPC, RDS, EC2, IAM)

- Developed reusable Terraform modules for EC2, RDS, VPC, and IAM provisioning
- Automated infrastructure deployment across dev and staging environments and Implemented environment isolation and state version control.

Monitoring & Observability Implementation

Tech Stack: Node Exporter, Prometheus, Grafana

- Deployed Prometheus and Grafana stack for Kubernetes monitoring, Configured Node Exporter and custom metrics collection.
- Created dashboards for CPU, memory, pod health, and network performance, Implemented alerting rules for production-level monitoring simulation.

SKILLS

Linux & Networking: Linux, TCP/IP, DNS, DHCP, Network Troubleshooting, User & Permission Management

DevOps & Cloud: Git/Actions, Jenkins, Docker, Kubernetes, SonarQube, Trivy, AWS (EC2, EKS, VPC, ALB)

Monitoring: Prometheus, Grafana

Scripting: Python, Bash

Familiar With: Terraform, Ansible, Helm, Argo CD, Azure, GCP
